## **Avipel® Hopper Box (Dry) Corn Seed Treatment - A bird Repellent**

**Avipel** - Effectively protects newly planted seed and seedlings from attack from a variety of birds. This will insure a more uniform stand and therefore, the potential for increased yields.

**Package Size** – Avipel Hopper Box dry formulation is available in 12 x 16.0 ounce canisters.

### **Avipel - Value and Advantages**

- Reduces the risk of costly replanting due to bird damage
- Cost effective treatment
- Hopper Box - easy to apply
- Permits treating seed just prior to planting

### **Handling Precautions:**

1. **Section 18 or SLN 24 (c) labeled Product** - Use only in accordance with individual State authority and regulations
2. Always follow manufactures label recommendations
3. Keep out of reach of children

### **Avipel Use Rate:**

Corn Seed – 2.0 ounces (one scoop) per 25 pounds of seed

# Avipel<sup>®</sup> Hopper Box (Dry) Corn Seed Treatment - A bird Repellent

## Directions for use:

1. Uniform coating of the seed is necessary to insure proper efficacy.
2. Always apply Avipel Hopper Box to the seed and mix thoroughly before additional dry products, i.e. talc or graphite is applied to the seed.
3. For best results, pour 25 pounds of seed into the planter box, and then add 2.0 ounces (one scoop) of Avipel and mix thoroughly with stick or paddle. For each additional 25 lbs. of seed add 2.0 ounces (one scoop) of Avipel and mix again so that all seeds are covered.
4. Use only at labeled rate.

## Package Size:

- Case - 12 x 16.0 ounce canister
- 48 - Cases per pallet.

Product	Case Size*	Treatment rate
Avipel Hopper Box Corn ST	12 x 16.0 ounces	2.0 oz. per 25 lbs. of seed

\*One canister treats approx. 200 lbs. of seed & one case treats approximately 2,400 lbs. of seed.
