## Avipel<sup>®</sup> Liquid Corn Seed Treatment - A bird Repellent

**Avipel** - Effectively protects newly planted seed and seedlings from attack from a variety of birds. This will insure a more uniform stand and therefore, the potential for increased yields.

**Avipel** - Can be used in continuous flow or batch treating equipment with either slurry or direct injection systems.

### Avipel - Value and Advantages

- Reduces the risk of costly replanting due to bird damage
- Cost effective treatment
- Liquid formulation is easy to apply
- Permits treating seed ahead of busy planting season
- Can be used on both Field and Sweet corn

### Handling Precautions:

1. **Section 18 or SLN 24 (c) Labeled Product** - Use only in accordance with individual State authority and regulations
2. Always follow manufactures label recommendations
3. Keep out of reach of children
4. Keep product from freezing
5. Shake well or agitate prior to use

### Avipel Use Rate:

Corn Seed – **By volume**, 13.5 fluid ounces of Avipel per one hundred pounds (cwt) of corn seed or **by weight**, 16.5 ounces of Avipel per one hundred pounds (cwt) of corn seed. One gallon will treat approximately 980 pounds of corn seed.

Suggested rate: Some variation may occur. Rate may need to be adjusted to obtain desired coverage due to variation in seed size, seed coat, application equipment and total slurry.

# Avipel<sup>®</sup> Liquid Corn Seed Treatment - A bird Repellant

## Directions for use:

1. Shake well or agitate prior to use.
2. Add Avipel to the mix tank. Start and maintain constant mechanical and by pass agitation throughout the entire mixing and treating process.
3. Accurate calibration of the application equipment and frequent checks of this calibration is recommended to insure proper seed coverage.
4. Uniform coating of the seed is necessary to insure proper efficacy.
5. Depending on the type of seed treating equipment a small amount of water can be added to the product to facilitate product flow through the spray nozzles. Do not exceed five (5) fluid ounces of water per gallon of Avipel.
6. Environmental conditions such as temperature and humidity could have an effect on handling and during the drying of seed just after treatment.

## Package Size:

- 2 x 2.5 gallons – 24 per pallet

Product	Container	Treatment rate	No. cwt treated per 5 gallons
Avipel Liquid Corn ST	2 x 2.5 gallon	13.5 fl. oz. /cwt	49 (4,900 pounds of seed)
